CONCLUSION	

Letter to Stakeholders

Dear readers,

It is with great pride and pleasure that I introduce you to the first voluntary Impact Report of the Acrisure Italia Group. 2023 was a year of significant growth, marked by challenges, exciting new opportunities, and success. Last year's accomplishments are a testament to the strength of our business model and strategic decisions, which have paved the way for continued success. Our momentum in the Italian insurance brokerage market continues to build, propelling us to solidify our national and international presence.

Our outstanding achievements are the result of a collective effort, and we are immensely grateful to our dedicated employees, collaborators, and business partners. We believe in transparency and information sharing to build trust and strengthen our relationships with all stakeholders. Committed to continuous improvement, we actively seek feedback and suggestions from both team members and partners to optimise our performance.

Our unwavering commitment to sustainability and a responsible approach to our social impact has always been the cornerstone of our corporate mission. This dedication has been further solidified by our transition to a Benefit Corporation. The primary objective of this report remains to document the efforts and results we have achieved in relation to these key areas; promoting employee well-being and social inclusion, actively supporting the local communities where we operate, and reducing pollution and waste.

Stefano Francesco Sardara
Chief Executive Officer

Every success and every new opportunity stems from a shared sense of belonging and brand identity that we strive to strengthen day after day. Our Benefit Corporation status heightens our awareness of our environmental and social impact. This translates into innovative solutions that optimise resource use, and reduce inequalities by fostering greater access to employment opportunities.

The initiatives documented in this report, undertaken throughout the past year, will serve as the enduring foundation for a more sustainable future. Acrisure Italia is firmly committed to the principle of unified growth and sustainability. Our primary objective is to solidify ourselves as a socially responsible force within Italy's vibrant entrepreneurial landscape - a community which we are proud to be a part of.

ACRISURE ITALIA

INSURANCE BROKER

Acrisure Italia S.p.A: Insurance broker operating at national and international level.

Our company was founded on the strength of a team with three decades of industry experience. Over the years, this time has honed our expertise, combining a high level of professionalism with a commitment to innovation, quality and efficient resource management. This dedication extends to the field of risk management, ensuring we provide comprehensive solutions for our clients.

We represent, assist, and protect clients in their dealings with insurance companies. Our advisors work closely with a wide range of clients, including individuals, professionals, and organisations. We prioritise understanding unique needs and tailor our brokerage services to find the most effective insurance solutions. We collaborate with top industry providers, offering a vast selection of products that meet specific needs.

We serve as a main intermediary, offering a comprehensive portfolio of motor and life insurance solutions. In the motor insurance space, we specialise in fleet management (including MTPL documentation and coverage), individual policies (MTPL and MOD), and sustainable mobility options. Regarding life insurance, we offer expertise in areas such as medical reimbursement, permanent disability, term life and long-term care insurance. Beyond client services, we foster strategic partnerships with top national and international insurance companies. This collaboration allows us to support our valued customers in managing their products and act as a direct point of contact for inquiries and policy activations.

We combine human expertise and advanced technology to deliver a wide range of insurance, reinsurance, IT solutions, and more. Through the seamless collaboration of our various teams, we ensure high-quality and highly competitive services for our clients.

OUR BUSINESS SECTORS

REFERENCE AREAS

Claims & Services

We specialise in assistance and claims handling for customers with MTPL and MOD insurance policies. The critical role of efficient and swift claims processing is reflected in our operations, with our highly qualified claims department providing dedicated step-by-step support throughout the entire process in the event of a covered loss.

- Information gathering;
- Document collection;
- Policy information;
- Complete claims management (opening, investigating, negotiating, settlement);
- Referral to partner networks.

TPA – Customer Service

We offer a dedicated customer service line which provides real-time, accurate and specific information to our customers.

In addition to our phone lines, we also offer assistance through e-mail. This method of communication allows for the efficient gathering of documentation needed to open or close a claim.

Acrisure's Customer Service team is here to provide exceptional phone support for insurance needs. Our team of experts is available to assist with managing claims and understanding intricacies of policies.

Automotive Solutions – Motors

Our strong partnerships with key players in the insurance market enable us to provide clients with innovative insurance solutions and bespoke products. By partnering with Acrisure, a global InsurTech leader, we deliver integrated insurance solutions powered by cutting-edge digital tools. This simplifies the process and enhances the customer experience for a smoother journey.

We excel at developing MTPL programs that control costs and offer innovative solutions like operational leases, showcasing our expertise in finding solutions. We constantly benchmark the national insurance and reinsurance markets and thoroughly analyse the technical performance of risks. Through our approach, partners consistently receive the most technically and economically advantageous offer, ensuring a sustainable risk profile for the company. The motor division currently manages a fleet of vehicles that places us at the top of the national broker ratings.

Fleet Leasing, Transportation, and Public Entities

Management of MTPL/MOD/Ancillary Warranty programs on corporate fleets consisting of cars, commercial vehicles, motorcycles, mopeds and trucks.

Group MOD policies distributed by Financial Institutions

We assist major financial institutions in selecting, creating and managing the best insurance products to distribute to their client, in collaboration with the leading insurance companies.

Welfare

We deliver prompt and comprehensive healthcare solutions with a growing emphasis on preventive care and risk management, promoting lifelong well-being for individuals and their families. This innovative approach focuses on proactive welfare, identifying and monitoring potential health risks throughout a person's lifespan. The market context in which we operate is mainly characterised by funds and pension funds through group policies. Among the insurance covers we offer are:

- Reimbursement of medical expenses;
- Occupational and non-occupational accidents;
- Permanent disability;
- Term life insurance;
- Critical illness coverage.

Employee Benefits

We develop corporate welfare programs that are tailored to the needs of our clients, integrating them with highly advanced technologies to offer the most intuitive user experience possible. We offer a range of benefits, including, but not limited to: healthcare and medical benefits, leisure and free-time, shopping and travel. Employees can interact with a dedicated platform for managing fringe and flexible benefits.

Property & Liability

We offer risk analysis, consulting, and management services that are constantly updated with the latest trends in the insurance market. We work with companies of all sizes, from small and medium-size businesses, to large corporations. Our coverage safeguards businesses with property insurance for asset protection and liability insurance against third-party property damage and injuries. Our services include: D&O insurance, All Risk policies, employers' liability, TPL, Surety bonds, and technology risks.

Public Entities

We help entities find the best balance between economic and qualitative factors when choosing between risk shares to be managed autonomously and risk shared to be transferred to third parties through insurance coverage. Our intermediation work allows the entity to find the insurance company that offers the most suitable product and complies with its specific needs. We assist the entity in all phases of the tender and assist in the complex procedures of the new procurement code.

Reinsurance

We provide reinsurance to companies in all lines of business (life and P&C), on both a treaty and facultative basis:

- Technical and actuarial pricing;
- Improved definition of the reinsurance structure in terms of risk appetite and cost of capital (Solvency II);
- Modeling and monitoring of catastrophic exposures;
- Contractual and administrative management.

Agriculture

We specialise in providing comprehensive insurance solutions for farmers across Italy. We have a strong focus on weather and climate-related policies, ensuring our offerings cater to the specific needs of the agricultural sector. This acquisition strengthens Acrisure's position as a leading provider of targeted and competitive solutions for farmers nationwide.

Salary and Pension-backed loans

We combine advanced technology with our insurance expertise to identify the most suitable solutions for our clients. Furthermore, our comprehensive financial portfolio management ensures they get the most out of their investments.

COMPANY STATUTE

OUR BENEFIT COMPANY STATUS

Acrisure Italia became a Benefit Corporation in December 2022. This decision embodies our core values, reflecting who are and who we want to be in the future. We are committed to being a beacon for our employees' personal and professional growth, while also making a positive impact on the communities we serve.

These goals are enshrined in our company's statute, which outlines our values and defines our entrepreneurial identity. We achieve our aims through continuous dedication to various initiatives. Here's a glimpse into our statute and the key principles that guide us:

We are committed to operating in a responsible, sustainable, and transparent way, creating a positive social and environmental impact alongside our business success. The company therefore qualified as a **Benefit Corporation**, outlined in Italian Law **No. 208 of December 28, 2015 (Sections 376-383 and Annexes 4-5)**. This legal status formally recognises our commitment to improve society, not only through the production of economic wealth, but also by promoting the value of human capital. We're dedicated to empowering our employees to grow, fostering a fulfilling work environment for all, and supporting innovative projects that respect the environment and promote sustainable development.

As part of its business operations, the company aims to achieve the following common benefit goals:

A. Provide services that consistently improve customer relationships and create economic, social, and environmental value;

B. Promote sustainable work practices that prioritise the well-being of individuals by meeting their fundamental human needs. This work includes flexible work arrangements, a positive environment that fosters development and growth, and respect for each individual's skills and potential;

C. Reduce environmental impact by prioritising the critical issue of sudden and unpredictable climate change. We aim to avoid wasting resources and promote sustainable lifestyles for the benefit of the environment and our people. We will do this by (i) empowering staff to reduce greenhouse gas emissions for company activities and work-related travel, (ii) procuring renewable energy sources, (iii) gradually converting our car fleet to hybrid/electric models;

D. Support projects of collective interest in collaboration with public institutions, local authorities, businesses, and both profit and non-profit organisations. We aim to align our goals with these partners and amplify the positive impact of their work;

E. Cultivate a positive work environment that prioritises our employees' well-being and development. We aim to unlock everyone's potential and foster a sense of pride and satisfaction in being part of the team;

F. Invest in the personal and professional growth of our employees, collaborators, and administrators. We offer training and cultural activities, and we are committed to developing corporate welfare initiatives;

G. Build responsible and transparent relationships with our commercial partners and suppliers. We prioritise working with partners who are committed to responsible environmental and social practices.

MISSION & VALUES

We consider it critical to formally incorporate these values into our statute. These principles serve as a guiding framework for our company's actions, not only nationally, but internationally as well. By adhering to these well-established and universally applicable principles that define our identity, we aim to exemplify best practices for our Group's future entrepreneurial ventures.

Being a Benefit Corporation requires genuine commitment to the cause, a positive and proactive mindset that encompasses ourselves, our lives, and our future.

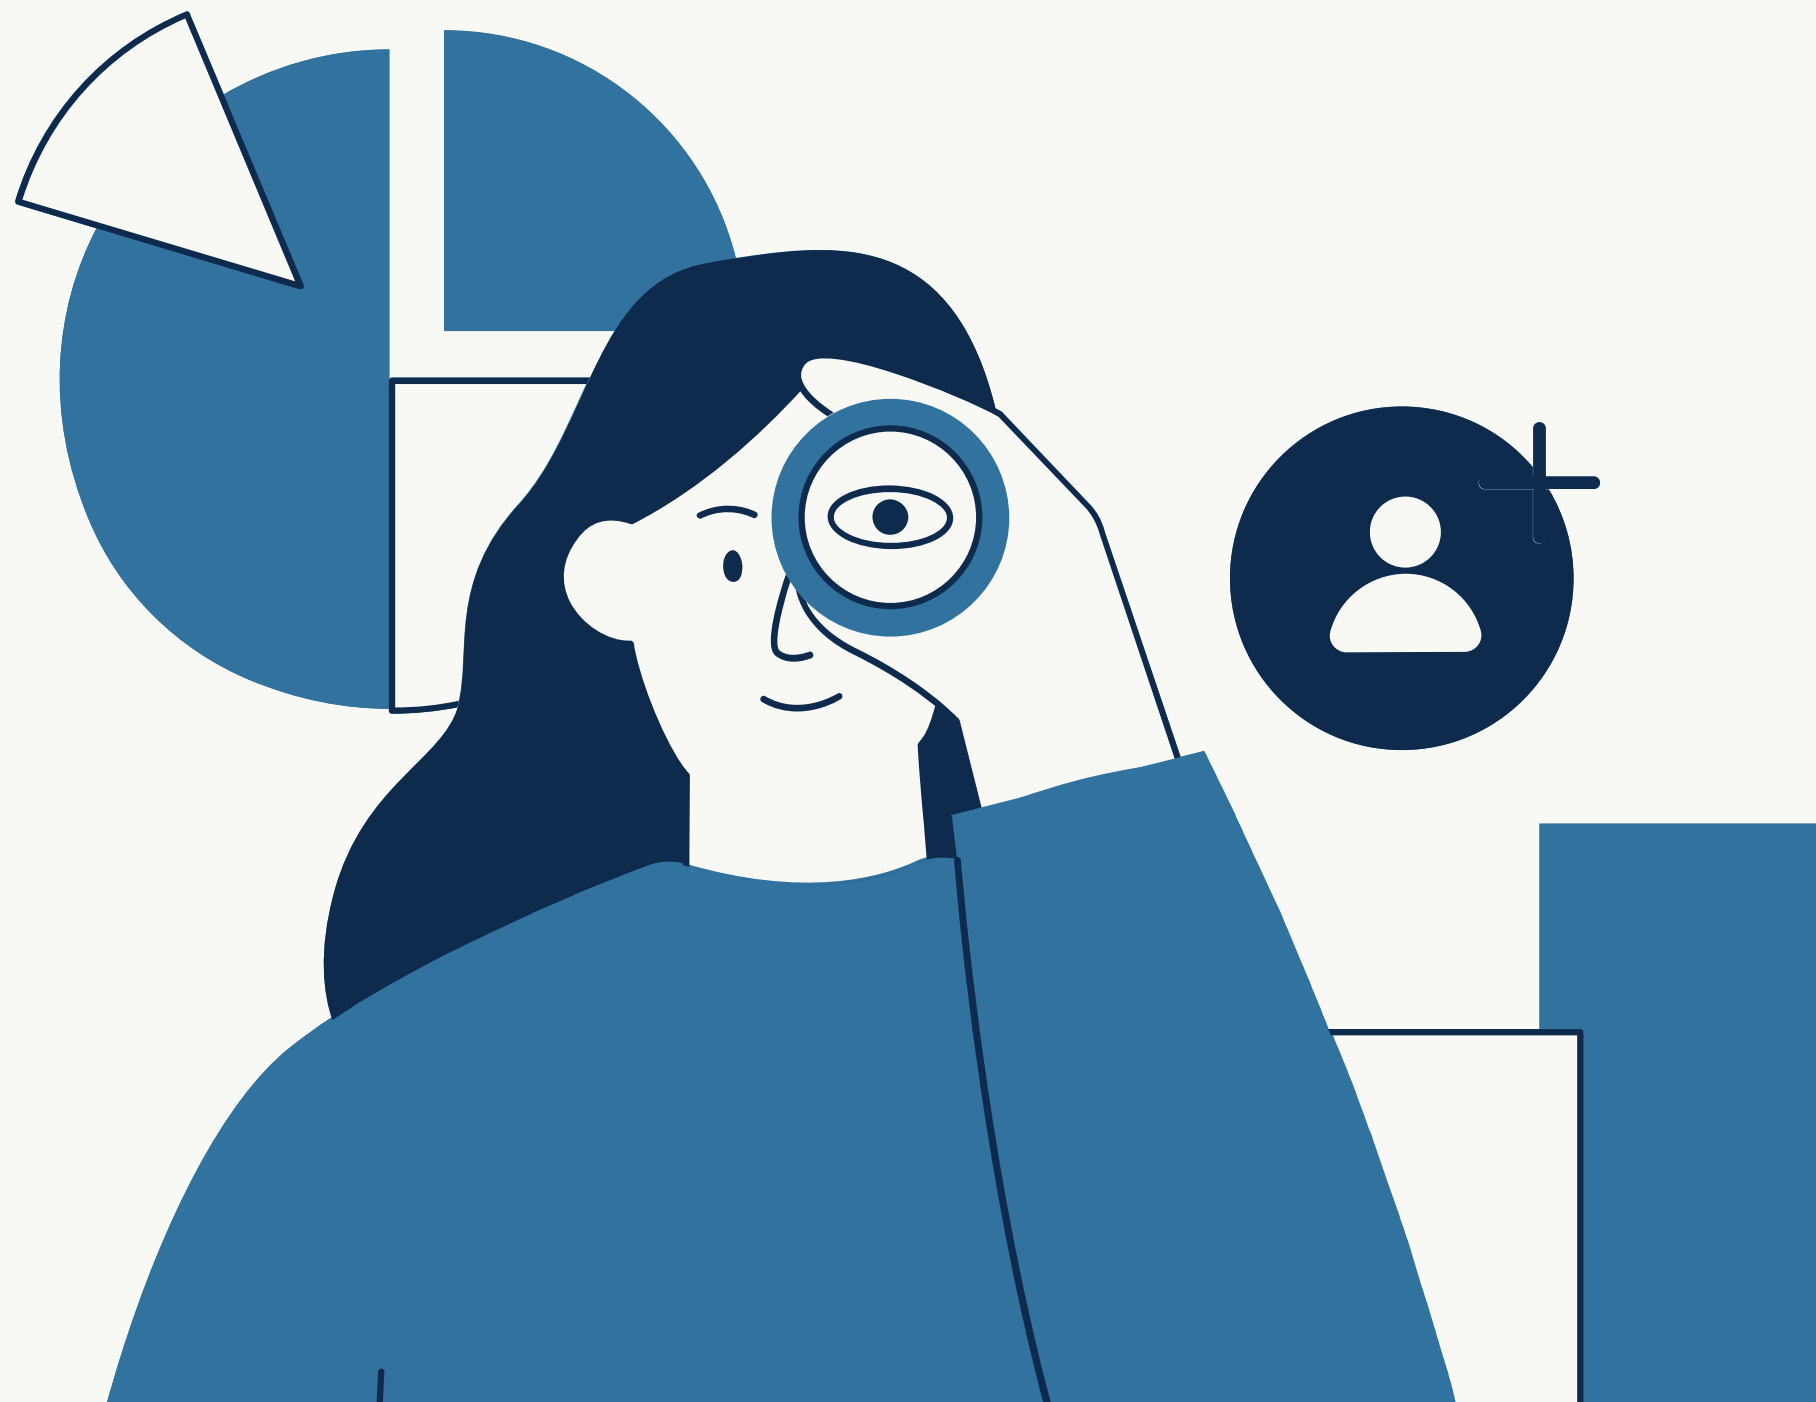

CORPORATE MISSION

We stay up-to-date on market trends and developments and combine our experience, professionalism, and cutting-edge technology to build high-quality relationships with our partners, suppliers and clients.

CORPORATE VALUES

We believe in the power of relationships. We build an atmosphere of mutual trust, allowing for continuous improvements to the customer experience. People are at the heart of our business. We combine our goals with ethical and social principles, ensuring our actions align with a comprehensive vision of sustainability.

BENEFIT CORPORATION

A LONG-TERM COMMITMENT

SUSTAINABILITY IN BUSINESS MANAGEMENT

OUR PROJECTS

"Sustainable development is both a way of looking at the world, with a focus on the interlinkages of economic, social, and environmental change, and a way of describing our shared aspirations for a decent life, combining economic development, social inclusion, and environmental sustainability."

Jeffrey Sachs

At Acrisure Italia, we believe that being a Benefit Corporation is a long-term commitment that should guide every business decision we make. Our results extend beyond financial metrics and take pride in the positive societal impact we create through our commitment to social responsibility. We believe that our employees, partners, and suppliers are our most important assets, and we are committed to investing in their development. We believe that a motivated, well-trained and satisfied workforce is essential to the company's continued success.

Acrisure Italia is committed to creating a workplace where everyone feels valued and respected. We believe that diversity and inclusion are essential to our success, and we are committed to promoting equal opportunities for our employees. We also believe that a healthy work-life balance is important, and we offer a variety of programs and benefits to help employees achieve this. In addition to our commitment to our employees, we also strive to help the local community. We support a variety of initiatives that focus on education, environmental sustainability, and social justice. We believe that these initiatives are important to making our community a better place to live and work.

Formalising our Benefit Corporation status solidified our ongoing dedication to sustainability. We have always championed innovation in all its forms, recognising its role in driving lasting, environmentally responsible growth. We have embarked on a journey to ensure the long-term viability of our business model, focussing on three key objectives:

- Supporting the realisation of the objectives outlined in the UN's 2023 Agenda for Sustainable Development;
- Meeting the objectives set out in our statute;
- Strengthening our business and solidifying our market position by pursuing opportunities of the ESG model: *Environmental, Social, Governance*.

Our long history of pioneering social and sustainable practices defines our company culture and sets us apart as a Benefit Corporation. We have fostered a thriving work environment while contributing positively to the economic and social systems we operate within. This commitment is a cornerstone of our identity as a Benefit Corporation.

ENVIRONMENTAL

SUSTAINABLE ENVIRONMENT

OUR COMMITMENT

Integrate sustainability into the workplace

Respecting the social and environmental landscape is at the core of our work. We champion good citizenship through a range of initiatives, from everyday actions to company-wide best practices.

1. ENERGY SAVING

Renovation of the Sassari headquarters:

Committed to a greener future, we completed the renovation of our Sassari office in 2023. The project included the installation of innovative *Aluinvent* panels, made entirely from recycled and recyclable aluminium. These panels act as a solar shield, significantly reducing energy usage in both hot and cold weather.

Solar Panel installation:

In a continued effort to reduce our carbon footprint, we installed state-of-the-art solar panels on the roof of our headquarters. This investment will significantly reduce our CO2 emissions and help us achieve our sustainability goals.

2. REDUCTION IN CONSUMPTION

Waste differentiation activities:

It is vital that each of us does our part every day in differentiating the waste produced during the workday. To promote responsible waste management, we have installed waste separation bins in common areas. This initiative simplifies waste sorting for our staff, minimising landfill contributions.

Paper consumption reduction:

Thanks to the digitisation of most of the company's documents, we have reduced the use of paper and consequently, its direct waste. Digital technology allows us to modify documents directly on our devices and share them in real time through the use of corporate emails, cloud systems and other digital storage spaces.

3. OFFICE SUPPLIES AND PROMOTIONAL ACCESSORIES

Sustainable gadgets:

We now source promotional accessories and corporate items made from recycled and eco-friendly materials.

S

SOCIAL HUMAN CAPITAL

OUR COMMITMENT

Invest in people for a sustainable future

A good working environment starts with ensuring a good quality of life for our staff. We have provided employees with a life insurance policy taken out through our partners. Furthermore, we have made a commitment to ensuring that working at Acrisure can create a real advantage to their lives, thanks to the provision of fuel and electricity bonuses.

1. SHARING

Company and team building events:

The fast pace of office life, full of goals, deadlines, and service-level agreements to be met, can be stimulating, but sometimes isolating. To combat this, we prioritise creating opportunities for team building activities. These gatherings are a great change to learn from each other, sharing skills and knowledge, and ultimately, to feel like valued members of our team.

English lessons:

We offer our employees the opportunity to participate in a free English language course offered by the company. Lessons are held on Monday to Thursday in person at our Sassari office and remotely for the Rome and Milan offices. The levels are divided into three, based on the Common European Framework of Reference for Languages.

Flexible working opportunities:

We offer flexible work arrangements, including working from home options to meet our employees' needs.

2. COMPANY BENEFITS

Health insurance:

At Acrisure, we believe that health insurance is essential for peace of mind. That is why we provide our permanent employees with an annual life insurance policy that can assist them in case of health needs and medical expenses.

Fuel vouchers:

In recognition of rising fuel costs, we have decided to offer fuel vouchers to support our employees' mobility needs.

Electricity Bonus:

3. We understand that the rising cost of electricity can be a burden on our employees and their families. We offer an electricity bonus to help with these essential expenses.

G

GOVERNANCE

BUSINESS AND COMMUNITY

OUR COMMITMENT

Share the values that unite us

We are constantly making improvements through investing in new technologies and training. This is reflected in our ability to attract top talent and make them an integral part of our company. Demonstrating our dedication to the local community and healthy lifestyles, Acrisure Italia champions sport through sponsorships with the *Dinamo Banco di Sardegna Sassari* basketball team and freediving champion *Sanda Delija*.

1. INNOVATION AND TRAINING

Artificial Intelligence Systems:

We have decided to implement Artificial Intelligence systems that can simplify daily work tasks, making them faster and easier. User-friendly AI tools will streamline tasks, boost performance, and guarantee greater efficiency, control, and analysis of the services we offer.

Meetings and training:

We invest in continuous training to ensure our employees are always up-to-date and therefore constantly improve our performance. We achieve this through a combination of online courses and partner-organised events, primarily hosted at our headquarters.

2. POSSIBILITY

Hiring of under-30s and recent graduates:

Investing in training and development is essential for the growth of our newly-qualified staff. We offer fixed-term contracts with opportunities for permanent employment, providing them with the training and support they need to succeed.

Women Empowerment:

We are proud of our strong female presence in all areas of our business. Our diversity makes us a stronger company.

3. SPORT E VALORI CONDIVISI

Gold sponsor of *Dinamo* basketball: <https://www.dinamobasket.com/sponsor/acrisure-italia-spa>

Acrisure and *Dinamo*: One Heart. We proudly support the three *Dinamo* basketball teams: men's, women's, and Dinamo Lab.

Dinamo Foundation: <https://www.dinamobasket.com/fondazione>

We are committed to social responsibility and are proud to support the social projects of *Fondazione Dinamo* in Sardinia.

Sponsor of *Sanda Delija*: <https://www.instagram.com/sandadelija/>

We have embarked on a collaborative journey with freediver Sanda, supporting her in becoming a champion in the deep seas.

OUR SUSTAINABILITY LEVEL

B IMPACT ASSESSMENT AND MATERIALITY ANALYSIS

OUR SUSTAINABILITY IMPACT

EVALUATION STANDARDS

2023 presented significant challenges, but it was also a year of significant progress for us as a Benefit Corporation. We actively pursued goals and standards that define our mission, integrating them into our everyday business strategies. At the core of being a Benefit Corporation lies the pursuit of shared benefits. This means every decision we make considers not just its commercial viability, but also its long-term social and environmental impact. To measure our progress in this area, we utilised two key tools: the Materiality Analysis and the B Impact Assessment. Both methodologies provided valuable insights into our activities throughout the year and helped us chart a course for the future. The assessments highlighted our strengths, areas where we excel and should continue to focus, while also identifying areas for improvement. This allows us to develop stronger strategies and refine our approach to achieving our goals.

Our Evaluation Standards:

Companies can gauge their progress towards B Corp Certification through a free online assessment tool. This platform scores companies on a scale of 0 to 200, and those exceeding 80 points qualify for a full evaluation process. Following a successful evaluation, companies are eligible to receive B Corp Certification.

Adopted in September 2015 by all 193 UN member countries, the 2030 Agenda for Sustainable Development is a global action plan. Launched in early 2016, it outlines a set of goals that governments, businesses, and individuals are working together to achieve by 2030.

This guide offers practical guidance on Corporate Social Responsibility (CSR). Aimed at organisations looking to integrate social responsibility into their operations, it provides clear steps and suggestions. The focus is on engaging all areas of the business in identifying and implementing responsible practices.

B – IMPACT ASSESSMENT

B I A : B E N E F I T I M P A C T A S S E S S M E N T

A major step in measuring our impact has been the B Impact Assessment. This online self-evaluation tool (bimpactassessment.net) allows companies to assess their sustainability levels across five key areas: community, environment, customers, governance, and employees. By answering a series of multiple-choice and open-ended questions, we received a comprehensive sustainability score. The assessment highlighted areas where we excel, but also revealed opportunities for improvement. This valuable insight has fueled the development of new projects that will enhance our sustainable impact in the coming years.

While looking to the future, we do so with optimism. We recognise that significant challenges lie ahead, but we are confident in our ability to meet them with resolve and perseverance.

We achieved a score of 53.9 on the B Corp Assessment, which is a stepping stone towards B Corp Certification. This prestigious designation recognises companies that meet rigorous standards for social and environmental responsibility. While we have not reached the minimum threshold of 80 (on a 200-point scale) yet, we are actively working towards achieving it. We believe that B Corp Certification will significantly benefit all our stakeholders. Throughout 2023, we focused on establishing a sustainable foundation for our future projects through various initiatives. The following data showcases our initial progress, categorized by thematic areas.

MATERIALITY ASSESSMENT

MATERIALITY MATRICES CONSTRUCTION

Materiality analysis has become a fundamental tool in recent years for organisations pursuing sustainability goals. As companies embark on their individual journeys towards corporate social responsibility (CSR), this approach plays a pivotal role. Through the development of a Materiality Matrix, a visual representation derived from internal and/or external analysis, companies pinpoint the most significant sustainability aspects for both themselves and their stakeholders.

The term *materiality* emphasizes the tangible aspects that demonstrate a company's commitment to sustainability and can have a significant communicative impact. By analysing their material elements, companies can effectively communicate their commitment, creating a valuable strategic tool for building present and future actions and objectives.

The process of constructing the materiality matrix began with the selection of the most relevant topics for our company and our main stakeholders: management, employees, suppliers, clients, local entities, and institutions.

The topics were selected based on careful listening and analysis of internal company sources (objectives, strategies and company policies, reporting documentation, feedback from customers and suppliers) as well as monitoring of external inputs (guidelines and standards ISO 26000:2010, Agenda 2030, GRI Standard, legislative sources and evaluation of industry trends). In choosing which topics to consider materially impactful for our organisation, we endeavoured to answer two guiding questions:

- Which topic is relevant for my organisation (based on its purpose, activities, organisational model, operating context, and the awareness and orientation of internal stakeholders)?
- Which topic is relevant for our external stakeholders (considering their attention to the topic, the area of impact, and the area in which the stakeholders are particularly active)?

The following are the fifteen material elements that characterise our organisation's operations and their relative internal and external significance:

IMPACT TABLE - SOCIAL

The social dimension represents the totality of conditions contributing to human well-being. This includes security, health, education, democratic participation, and equitable access to justice. Fair distribution across social classes, genders, and geographical and cultural backgrounds is fundamental for the proper evolution of social development and the flourishing of communities. Building upon the social dimension, the 2030 Agenda advocates for a broader approach. Its focus lies on actions that affirm economic, social, political, and cultural rights for everyone, ensuring gender and racial equality. Additionally, it prioritises initiatives that safeguard the traditions and rights of local communities within their own territories.

The essential characteristic of Social Responsibility is the willingness of an organisation to integrate social considerations into its decision-making processes and to be accountable for the impacts of its decisions and activities on society.
ISO 26000:2010 Guidance on Social Responsibility

	ISSUE	DESCRIPTION	RELEVANCE FOR ACRISURE AND ITS STAKEHOLDERS	SDGs
SOCIAL DIMENSION	LOCALISING SOCIAL IMPACT EFFORTS	We support and embrace significant issues promoted by local and national associations.	5 / 5 RELEVANT	
SOCIAL DIMENSION	PROMOTING HUMAN RIGHTS AND EQUAL OPPORTUNITIES	We believe that work is one of the main ways to guarantee our employees, without gender discrimination, a healthy and fulfilling lifestyle.	3 / 8 RELEVANT	
SOCIAL DIMENSION	EQUAL TREATMENT AND OPPORTUNITIES	We priotitise dedication and the continuous pursuit of excellence, qualities that transcend all distinctions of gender, ethnicity, or social background	4 / 5 RELEVANT	
SOCIAL DIMENSION	EMPLOYEE ENGAGEMENT AND PROMOTION OF A SHARED CULTURE	The importance of feeling a sense of belonging and connecting to both the project and the team is essential. We actively involve our employees in activities that foster a strong and shared corporate identity.	8 / 8 EXTREMELY RELEVANT	
SOCIAL DIMENSION	ATTRACTING, TRAINING AND DEVELOPING TALENT	In a dynamic growth environment, attracting and selecting qualified talent and investing in their development becomes essential.	5 / 5 RELEVANT	
SOCIAL DIMENSION	SUPPORT FOR INITIATIVES AIMED AT MEDICAL AND SCIENTIFIC RESEARCH AND DEVELOPMENT	We strongly believe in scientific development and research, and we encourage internal and external initiatives aimed at supporting their campaigns.	8 / 5 RELEVANT	

IMPACT TABLE - ENVIRONMENT

The 2030 Agenda emphasises environmental sustainability, which translates to responsible management of the Earth’s natural resources. This means using them to meet the needs of current generations without jeopardising the ability of future ones to do the same. Environmental sustainability hinges on maintaining the ecological health of our planet, ensuring its ability to sustain itself over time. This includes tackling pressing environmental issues like resource depletion, pollution of all kinds, climate change, habitat destruction, species extinction, ecosystem collapse, and the degradation of both urban and rural settlements.

Environmental responsibility is a precondition for the survival and prosperity of human beings.
ISO 26000:2010 Guidance on Social Responsibility.

	ISSUE	DESCRIPTION	RELEVANCE FOR ACRISURE AND ITS STAKEHOLDERS	SDGs
ENVIRONMENTAL DIMENSION	PROMOTING A CULTURE OF ENVIRONMENTAL SUSTAINABILITY	Among our main goals is to promote a corporate culture aimed at reducing waste and promoting recycling. We communicate through company circulars (in electronic form only) or internal initiatives.	5 / 5 RELEVANT	
ENVIRONMENTAL DIMENSION	PROMOTING RESPONSIBLE CONSUMPTION ATTITUDES AMONG SUPPLIERS	Our supplier selection process extends beyond purely financial considerations. We prioritise partners who share our commitment to social responsibility.	3 / 8 RELEVANT	
ENVIRONMENTAL DIMENSION	USING RESOURCES AND MATERIALS SUSTAINABLY DURING EVENTS	Reducing environmental impact and waste is a key priority at our events. We collaborate with professional companies in the sector that align with our values in this area.	4 / 5 RELEVANT	
ENVIRONMENTAL DIMENSION	REDUCING THE ENVIRONMENTAL IMPACT OF STRUCTURES	While our business does not have a major environmental impact from a production perspective, we are committed to implementing sustainable practices within our facilities. This includes reducing energy and raw material waste.	8 / 8 RELEVANT	

IMPACT TABLE - GOVERNANCE

Effective governance relies on a clear framework. This includes rules and regulations, such as laws, that apply to organisations, regardless of size, purpose (profit or non-profit), or sector (public or private). This system guides decision-making, including the methods and tools used to achieve goals. To make well-rounded decisions, it is fundamental to consider the expectation of stakeholders and potential consequences of actions. Additionally, fostering a culture of social responsibility among employees is crucial.

"Effective organisational governance is critical for ensuring that an organisation takes responsibility for the impacts of its decisions and activities, and integrates social responsibility throughout its operations and relationships."
[Guida alla responsabilità sociale ISO 26000:2010](#)

	ISSUE	DESCRIPTION	RELEVANCE FOR ACRISURE AND ITS STAKEHOLDERS	SDGs
GOVERNANCE DIMENSION	FAIRNESS IN REMUNERATION, CONTRACTUAL AGREEMENTS AND WORKING CONDITIONS	We believe that a fair and transparent approach to contracts and remuneration is essential for creating a positive and productive work environment.	5 / 8 RELEVANT	
GOVERNANCE DIMENSION	WORK BONUSES	In response to the rising energy and fuel costs caused by the global economic crisis, we have provided our employees with company bonuses to help them cope with these increased expenses.	10 / 10 EXTREMELY RELEVANT	
GOVERNANCE DIMENSION	SUPPORTING THE LABOUR MARKET FOR YOUNG PEOPLE AND NEW GRADUATES	We periodically hold internal and external recruiting events aimed at hiring young workers and new graduates within our workforce.	5 / 8 RELEVANT	
GOVERNANCE DIMENSION	QUALITY OF CUSTOMER EXPERIENCE	Strong customer relationships are essential for success in the insurance industry and we are proud of our reputation for providing prompt, effective, and professional customer service.	8 / 10 EXTREMELY RELEVANT	
GOVERNANCE DIMENSION	IMPLEMENTING DIGITAL INNOVATIONS IN APPLICATIONS AND USER EXPERIENCE	It is essential to keep up with technical innovations in order to remain competitive in the industry. For this reason, we have decided to implement artificial intelligence programs within our procedures to make our work more efficient and effective.	4 / 8 RELEVANT	

MATERIALITY MATRIX

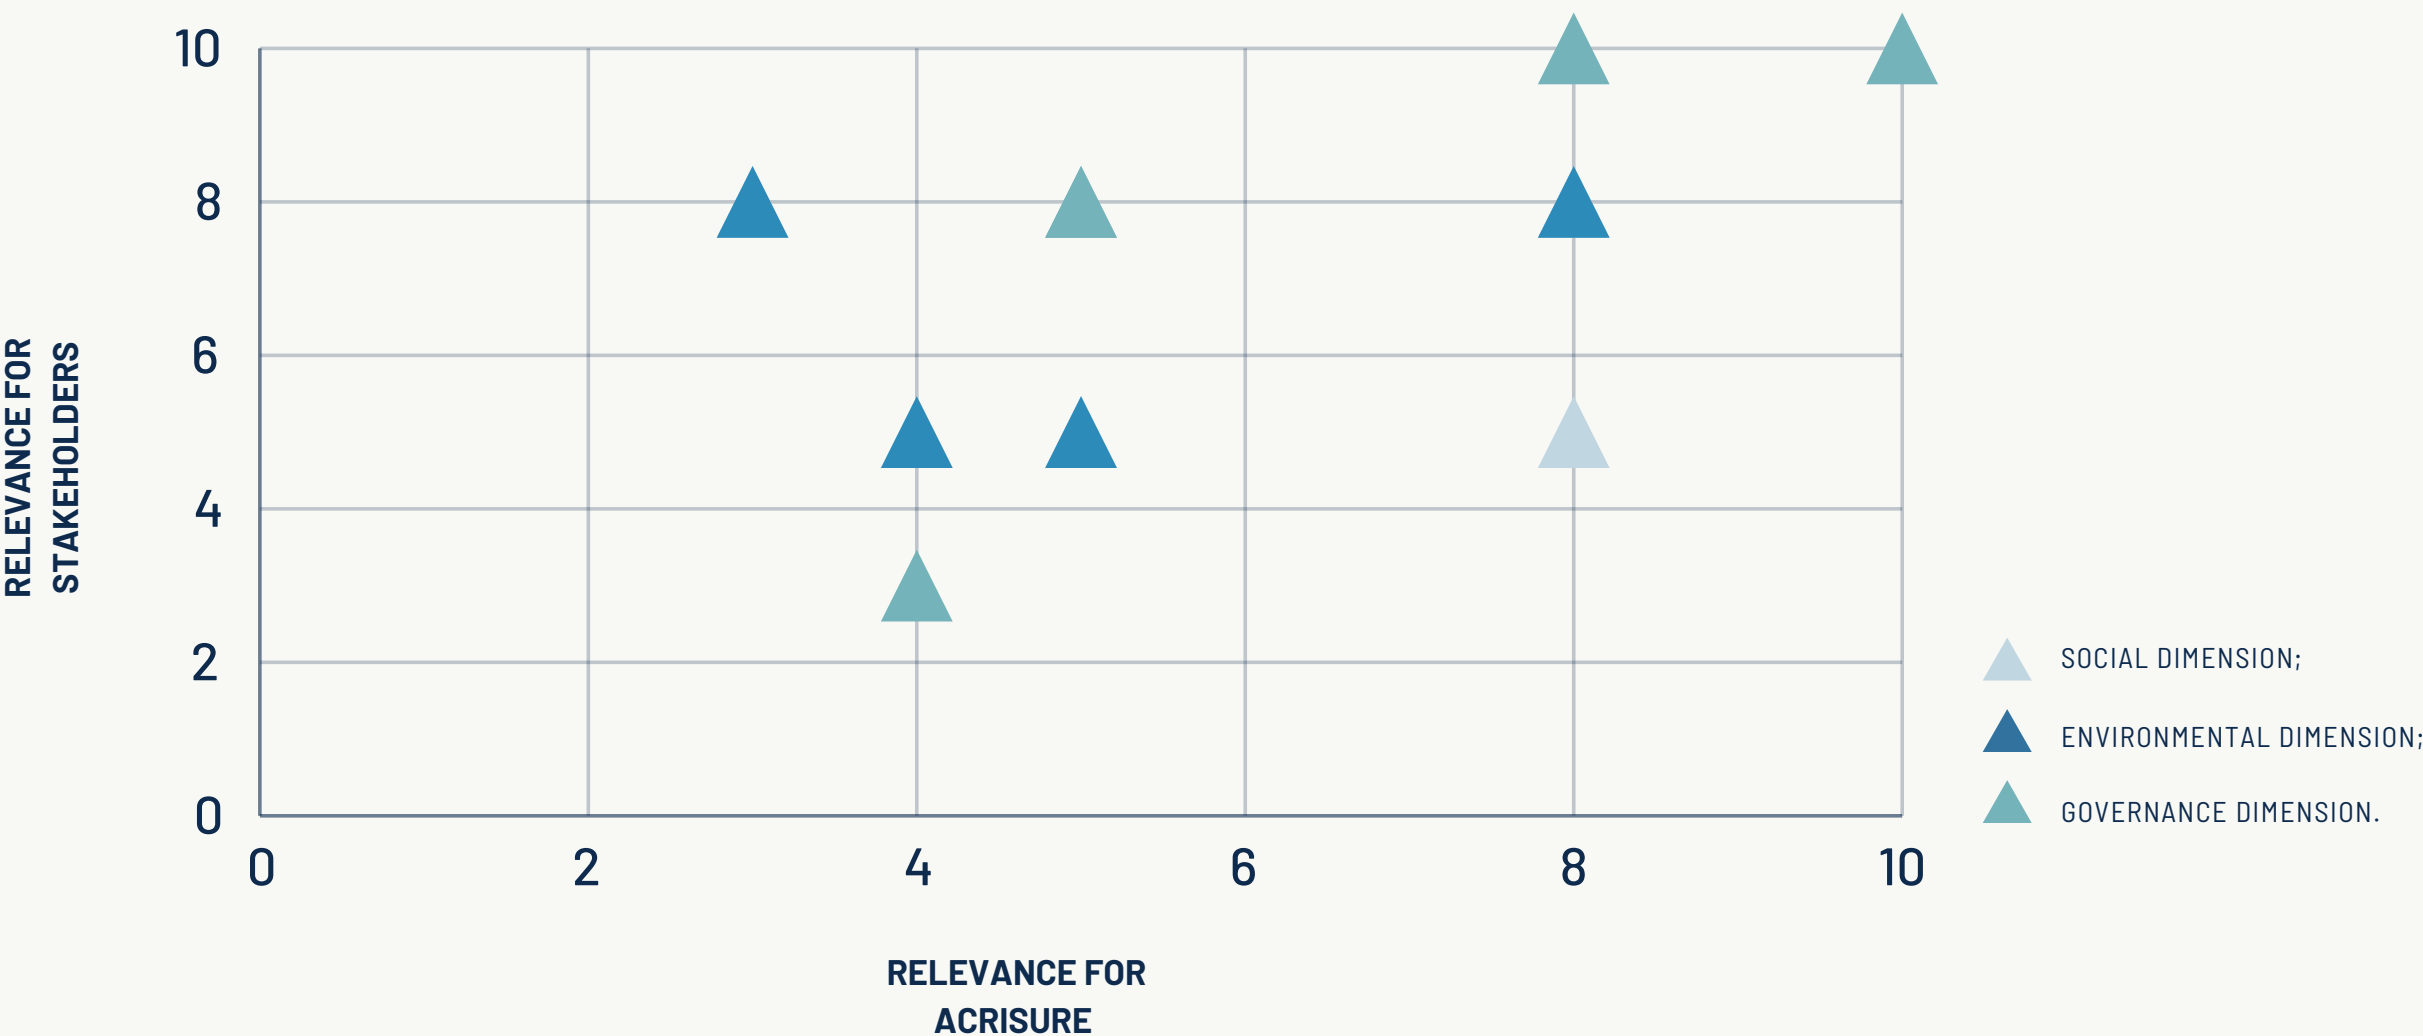

RESULTS

As a Benefit Corporation, we are committed to operating in a repsonsible and sustainable manner. This means that we focus, on three main macro-areas:

- SOCIAL DIMENSION;
- ENVIRONMENTAL DIMENSION;
- GOVERNANCE DIMENSION.

Each material theme has been analysed and described based on its application within our operations. In addition, they have been carefully examined and rated based on the importance they hold to our stakeholders:

- RELEVANT: value 1 to 5;
- EXTREMELY RELEVANT: value 5 to 10.

BUSINESS MODEL EVOLUTION

STRATEGIES FOR 2024

EVOLVING STRATEGIES

A S T A R T I N G P O I N T

Our Benefit Corporation status reflects our commitment to a broader purpose. We go beyond profit, aiming to create shared value with *everyone* affected by our operations,

Our business model was legally recognised by law **No. 208 of December 28, 2015 (Sections 376-383 and es 4-5)**. The aforementioned law entered into force on January 1, 2016. Through this legislative initiative, Benefit Corporations were introduced as a novel legal form of business organisation. This legislative advancement has empowered companies opting for this classification to embed and preserve their long-term values within their statute.

Becoming a Benefit Corporation is the official recognition of our core values. This achievement is the result of our ongoing efforts, which have not always been straightforward. We are proud to present our first impact report, outlining our goals for 2024 and the years ahead.

We will provide ongoing updates on our goals in future reports, issued annually from now on. These reports will reflect the strategies we put in place and the outcomes we achieve overtime, all in the spirit of full transparency regarding our work.

We recognise where we stand. Concerned by the state of our planet, we are committed to doing our part for a better future. We will work on creating real solutions, not just following trends. These issues are critical and affect everyone. By making conscious choices, we can all be ambassadors for sustainable development.

Accurate information is key to changing outdated mindsets. Thankfully, new generations are passionate about environmental and social responsibility. They embrace ethical and inclusive practices. The key to success lies in asking the right questions, setting achievable goals based on our starting point, and using data and resources efficiently. While we focus on realistic and measurable targets, we will not shy away from courageous and bold actions to ensure a better future for all.

'5P MODEL'

STRATEGY GUIDE

The 5P Model, which stands for People, Prosperity, Peace, Partnership and Planet, serves as a compass guiding our efforts. It is a powerful source of inspiration and embodies the founding principles of being a Benefit Corporation. This model underpins the UN's 2030 Agenda, a global action plan signed in 2015. Launched in 2016, this program is leading the way to a sustainable future for people, businesses, and countries alike. With a target completion date of 2030, the Agenda's importance is clear. The 5P Model's elements are, therefore, crucial. Outlined below are is own take on these elements:

PEOPLE: Our people are at the heart of everything we do, carefully choosing the right talent to build strong teams across our business sector. We value each person's unique skills and believe that sharing knowledge is key to team growth. We balance demanding work with enjoyable team-building activities to combat office stress. We are committed to continuous learning and investing in new technologies to make work easier and smarter.

PROSPERITY: Acrisure prioritises employee stability through the implementation of sound business strategies that facilitate the Group's sustained annual growth. We offer our colleagues the security of permanent employment contracts, fostering a stable work environment. Furthermore, Acrisure incentivises the pursuit of ambitious goals and continuous personal development through a robust system of awards and recognition programs. In a context of consistent growth, it is paramount to attract and select qualified personnel to integrate into our workforce and contribute to our continued expansion.

PEACE: We encourage our employees to build strong relationships with each other. We believe that a positive and supportive work environment is essential for everyone's success. We promote an inclusive and equal environment, and we are proud to have a high percentage of women in our workforce.

PARTNERSHIP: Choosing the right partners is essential to our business strategy. We look for partners who share our values and who are committed to building long-term, mutually beneficial relationships. These partnerships allow us to achieve our goals more effectively and efficiently, and they help us to create a more sustainable future for our business.

PLANET: We maintain a steadfast commitment to continually minimising our environmental footprint. This dedication is demonstrably evidenced by our ongoing initiatives. Notably, the structural refurbishment of our main headquarters will aid in reducing our environmental impact. This initiative is strategically aligned with our energy efficiency program with the installation of solar panels, aiming to reduce our energy consumption. Additionally, we have embraced the dematerialisation of documents, discouraging paper usage and promoting a paperless work environment. All in order to foster a more sustainable future.

SUSTAINABLE MINDSET

A GREEN IDENTITY

”

Being sustainable means being innovative and more efficient in transforming challenges into opportunities. Sustainability implies the creation of shared value, a value that benefits the company together with all its stakeholders. Until recently, the future of our planet and humanity itself did not seem to be a problem for individual entrepreneurs, managers and ordinary citizens, but only for national and international political institutions. Today, however, we cannot ignore what events and science show us every day.

Barbara Santoro

Pensare sostenibile: Una Bella Impresa

We are confident that actively promoting these ideals and taking concrete steps, both large and small, will foster a growing sense of environmental awareness and commitment within our organisation. Our ultimate goal is to cultivate a holistic approach to ecological thinking, driving a comprehensive vision of corporate sustainability. This vision will permeate all aspects of our operations and naturally engage every employee. To achieve this, we must not only disseminate these principles through formal channels like company communications, but also through initiatives that empower individuals to contribute directly.

Ultimately, transforming our business model requires a gradual shift in our corporate mindset. We must move beyond our current practices and fully embrace the values of sustainable development.

Through ongoing evolution, we at Acrisure have realised that simply adapting to the issues and innovations outlined in the 2030 Agenda would not sufficiently address the commitments we, as a company, must take ownership of. To effectively implement these advancements, we require a more agile and responsive approach. This reduces bureaucratic hurdles and fosters timely, yet measured actions.

As a Benefit Corporation, our progress is built on a series of achievable, impactful steps that align with our core values. This does not prevent us from setting ambitious long-term goals that will require sustained dedication in the coming years.

ACRISURE SUSTAINABILITY

ESG STRATEGY 2024

Creating an ESG strategy means analysing the values that guide operations towards sustainable outcomes. These values translate into actions across three key areas: Environment, Social Responsibility and Governance. Sustainability is an increasingly crucial concept in the current economic landscape, and businesses are being called upon to take a stance on the issue by demonstrating their responsibility towards the environment and the societies in which they play a fundamental role. Communication is crucial in conveying one's commitment and demonstrating transparency and ethics. To guide our journey as a Benefit Corporation, we are launching ACRISURE SUSTAINABILITY in 2024. This program will gather ideas, goals and projects to drive our progress on Environmental, Social and Governance (ESG) initiatives.

With a triple focus, ACRISURE SUSTAINABILITY aims to:

- Embed environmental and social responsibility into our strategic business actions;
- Monitor the progress and suitability within our operational context;
- Engage key stakeholders with an integrated communication program across email, our company website, and social media.

ACRISURE SUSTAINABILITY has adopted a green leaf to identify our year-round social and environmental impact initiatives. We want to go beyond just initiatives however, and ACRISURE SUSTAINABILITY will both educate and inspire. We aim to express our values and efforts in various ways, from advertising campaigns to engaging communication initiatives on the topic, promoting events and calls to action. By speaking directly to our readers through our communication channels, we strive to empower them with knowledge and encourage maximum participation of all those involved in our sustainability journey.

INTEGRATED COMMUNICATION

ACRISURE SUSTAINABILITY

The ACRISURE SUSTAINABILITY project will be promoted through a comprehensive communication plan. Through strategic methods, we will leverage our existing platforms to maximise content sharing, encouragement, and active audience participation.

WEBSITE:

A new section will be created on our website to showcase our sustainable projects. This dedicated information hub will feature a quarterly WEB MAGAZINE with articles on our sustainability initiatives, aimed at business partners, suppliers and all stakeholders.

SOCIAL MEDIA:

To promote sustainability within the Acrisure Community, we will leverage our social media channels by sharing informative content on eco-friendly practices and green tips. Additionally, we plan to organize engaging employee challenges to foster active participation in our sustainability initiatives.

INTERNAL COMMUNICATION:

To foster a culture of sustainability within the company, we will be launching a dedicated employee newsletter. This newsletter will serve as a platform to share informative content on sustainability practices and initiatives. Additionally, we will be incorporating engaging elements such as quizzes and "green missions" to encourage employee participation and learning. Furthermore, department heads will be actively involved in promoting these efforts, solidifying our commitment to sustainability at all levels of the organisation.

ACRISURE SUSTAINABILITY

ESG STRATEGIES 2024

Our roots are firmly anchored in the world of insurance consulting and brokerage. Since our foundation, we have been committed to a set of principles which lie at the heart of everything we do, including but not limited to, fairness; professionalism; independence; and transparency. Fundamentally, respect is the core value which guides our interactions with all stakeholders, from clients and suppliers; to employees and the community.

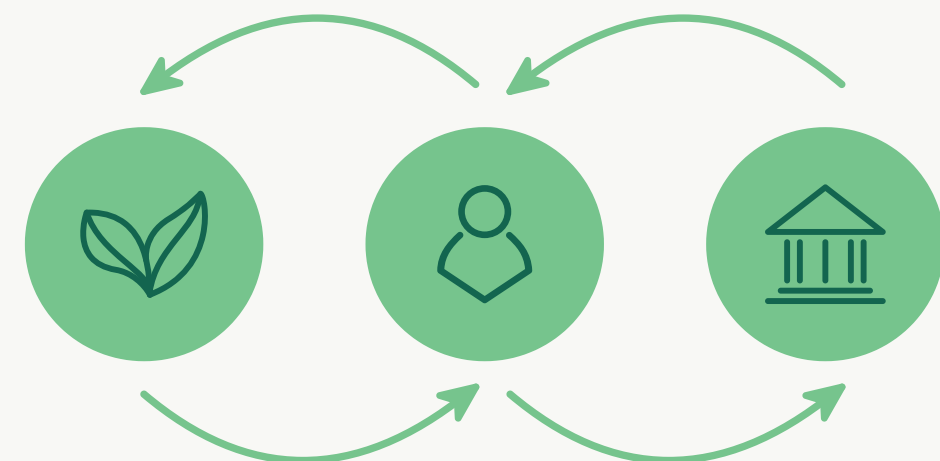

OUR COMMITMENT TO A SUSTAINABLE FUTURE

In defining our corporate strategy, we have long adopted a proactive and future-oriented approach. This mindset has allowed us to concretely formalise our commitment within the principles that make up our statute. Social responsibility and sustainability have not remained simple conceptual definitions, but are today, the fundamental pillars of our business identity, representing the goals and objectives that will guide the Group's choices in the near future. Our commitment to responsible and sustainable corporate management manifests in our dedication to the well-being of the communities we serve, while simultaneously fostering long-term and shared business growth.

In the face of the urgent climate crisis, we are taking a proactive approach by integrating relevant regulations and industry best-practices into our decision-making processes. Through this commitment, we aim to achieve a quantifiable reduction in our environmental footprint.

We are committed to building a sustainable future by setting medium- and long-term goals that prioritize resource conservation, waste reduction, proper waste disposal (including e-waste), and emissions reduction.

Responsible procurement, sustainable resource use, consumption reduction, and minimal waste generation are now fundamental business practices. While we acknowledge limitations in directly controlling the environmental impact of our entire supply chain, we are committed to collaborating with suppliers and partners who share our commitment to sustainability. This collaborative approach, coupled with selecting suppliers aligned with our ethical principles, ensures social responsibility is embedded throughout our operations. Our focus on minimising our ecological footprint extends beyond the supply chain. We are actively fostering a sustainable and inclusive work environment that prioritises the well-being of all employees.

ESG STRATEGY 2024

PLANS FOR THE FUTURE

ENVIRONMENTAL

Our current journey is the culmination of a long-term vision set in motion years ago. We go beyond strategic and financial goals, striving to minimise negative consequences for people, communities, and the planet, while maximising positive social and environmental impact.

RESPONSIBLE USE OF RESOURCES

Leveraging new digital technologies, we are on a continuous journey to reducing our paper use. Combined with responsible resource management, this approach minimizes our environmental footprint day by day. In our ongoing effort to minimise waste and enhance process efficiency, we actively promote digital tools as an alternative to traditional paper-based methods for contract and document circulation. We have invested heavily in document digitization, recognizing paper as a major source of unnecessary waste in everyday office operations. Our digital approach not only simplifies document archiving today, but also lays the foundation for a future with low paper consumption.

Our dedication to environmental stewardship extends to every aspect of our operations. We prioritize low-chemical and eco-friendly paper products such as toilet paper and paper towels. Moreover, all cleaning and sanitation products are biodegradable, demonstrating our commitment to minimizing our environmental impact.

ENERGY CONSUMPTION

The renovation of our headquarters in *Via Mazzini, 3* in Sassari marked the beginning of our journey towards sustainable energy management. This will bring long-term benefits over time. By implementing measures such as thermal insulation of the facades and architectural paneling using *Aluinvent* panels (secondary recycled raw materials), we have seen significant improvements regarding our energy supply. This approach has demonstrably led to, and will continue to facilitate, significant reductions in CO2 emissions and economic savings.

Complementing these initiatives, we have installed solar panels on the roof with an electronic monitoring system, ensuring ongoing performance verification and data collection. This continuous monitoring with cutting-edge technology is vital. It allows us to gather valuable data on energy use, enabling us to optimize consumption over time.

By analysing this energy consumption data from our meters and utility bills, we are able to track progress in reducing our environmental impact associated with energy use.

ESG STRATEGY 2024

PLANS FOR THE FUTURE

- **MEASURING AND REPORTING CO2 EMISSIONS**

To improve the transparency and consistency of our emissions data over time, we will be adopting the Scope 1 and Scope 2 classification methodologies. This approach will allow for a more comprehensive assessment of our sustainability performance, including comparisons with industry peers. By differentiating between direct emissions (Scope 1) arising from our own energy use and internal processes, and indirect emissions (Scope 2) resulting from the purchase of electricity and heat from external sources, we can identify and evaluate the environmental impact of our activities more accurately.

- **TRACKING, REPORTING AND OFFSETTING**

In 2024, we are committed to developing comprehensive social and environmental impact reports. These will encompass details on our CO2 emissions, including monitoring methodologies, reporting frameworks, and offsetting strategies. We can achieve this goal through a variety of activities, such as investing in reforestation projects, promoting renewable energy, and purchasing carbon credits.

Our goal is to promote transparency by publishing periodic reports detailing our energy consumption and environmental impact, including total CO2 emissions, a breakdown of our primary emission sources, and actions undertaken to reduce them.

ENVIRONMENTAL

- **WASTE MANAGEMENT**

We are dedicated to implementing responsible and sustainable waste management practices. This commitment includes collaboration with local waste disposal companies to ensure our waste follows a transparent and traceable disposal chain. Material recovery and regeneration are prioritised to minimise overall waste generation. Notably, a significant portion of our collected waste stream comprises paper and cardboard, which are recycled into new materials.

- **SUSTAINABLE EVENTS**

We would like to organise activities that involve our staff and their families in sustainable events dedicated to the community. These events could include beach cleanups or charity initiatives at hospitals and schools.

ESG STRATEGY 2024

PLANS FOR THE FUTURE

We value our employees and promote their personal and professional well-being. We encourage a healthy work-life balance and invest in specialised training to attract young talent. The initiatives we want to undertake reflect our continued commitment to creating an inclusive, sustainable, and forward-looking work environment, in line with our values and our status as a Benefit Corporation.

- **HUMAN CAPITAL**

We are dedicated to creating an environment that values and encourages the personal development of our employees. We always keep their well-being in mind, promoting a healthy work-life balance and allowing them to reach their full potential. This approach helps our employees feel satisfied and proud to be part of our team.

We want to further enhance the value of our human capital through work-life balance and corporate welfare initiatives. Specifically, one of our goals for 2024 is to continue implementing actions aimed at improving the work environment by monitoring the level of well-being and satisfaction of those who work with us.

- **INCREASED TRAINING HOURS**

We plan to implement a training program aimed at enhancing the soft skills of our employees and collaborators, in addition to the mandatory training required by the IVASS regulation. This approach aims to develop transversal skills such as effective communication, leadership, stress management, and teamwork: essential elements for individual and corporate success in a constantly evolving working environment.

SOCIAL

- **REMOTE WORKING POLICY**

To solidify the adoption of our remote work policy throughout the organisation, we are implementing a program to ensure employees have the necessary technological infrastructure. This will involve the distribution of appropriate electronic devices.

- **EMPLOYEE-CENTRIC**

We are committed to empowering our people by designing personalised and group development paths. These plans will be aligned with Acrisure's structure and future strategy, ensuring our employees have the skills to excel in their roles. Any skill gaps will be addressed through individual and group training, ensuring success for all.

- **CARE FOR PHYSICAL AND MENTAL HEALTH**

We are broadening the scope of health insurance to encompass mental health and preventative care, improving our workforce's overall well-being.

- **GENDER EQUALITY**

We promote diversity through initiatives aimed at reducing the gender gap and integrating actions that encourage equal opportunities at all levels of the organisation. Creating programs that enable women to advance in their professional careers is fundamental.

ESG STRATEGY 2024

A FUTURE WHERE WOMEN ARE EMPOWERED

SOCIAL

In 2024, we are focusing on elevating the role of women within the Acrisure Group. This initiative will permeate all aspects of our operations, underscoring our commitment to breaking down barriers, encouraging inclusion, and upholding the principles of equal rights and opportunities for women.

- **FEMALE WELL-BEING**

We will integrate programs and resources specifically designed for the well-being of women in the workplace. This includes the support for maternity leave, flexible work arrangements to foster a healthy work-life balance, and educational initiatives to raise awareness about female health.

- **SOCIAL RESPONSIBILITY**

As a Benefit Corporation, we can further our commitment to social responsibility by actively supporting causes and organisations dedicated to empowering women and fostering gender equality in the community.

- **FEMALE LEADERSHIP**

By promoting women who have demonstrated dedication and preparedness will not only ensure strong leadership, but also cultivate a more diverse and innovative leadership team. The unique skills, perspectives, and leadership styles of women can enrich the overall business strategy and contribute to the creation of a more collaborative and innovative work environment.

- **CAREER OPPORTUNITIES**

We are committed to increasing the number of female hires and promoting gender diversity within our organization. We believe that this will help us create an even more inclusive work environment where different viewpoints and experiences are valued. This, in turn, will help us to develop a more successful business strategy.

"Women Empowerment" is the process of including women in decision-making and highlighting their skills in making strategic choices. This helps women to become more aware of their abilities and participate more actively in the company's goals.

ESG STRATEGY 2024

PLANS FOR THE FUTURE

To create a more engaged and productive workforce, we are committed to increasing employee involvement in the group strategy, alongside exploring additional actions for improved corporate governance.

- **QUARTERLY BOARD ENGAGEMENT**

To ensure the successful implementation and ongoing effectiveness of our ESG strategy, we will adopt a multi-faceted approach. This includes direct oversight from our Board members, facilitating active dialogue between the Board and the Impact Manager to assess progress and identify potential areas for improvement. Additionally, we will actively engage our employees in ESG initiatives, building a shared sense of accountability and a more engaged corporate culture.

- **ACTIVE BOARD ENGAGEMENT**

The Board of Directors has a wealth of experience and expertise that can be used to support the Benefit Corporation. For example, a Board member with experience in Human Resources could help develop corporate volunteering programs, while a Board member with a financial background could help develop sustainable business models for social projects.

- **STAKEHOLDERS**

We believe that insurance culture and effective risk management practices are essential for the development of a sustainable and inclusive society. We collaborate with local entities, universities and institutions to raise awareness surrounding these issues and co-develop impactful solutions that contribute to achieving these shared goals.

GOVERNANCE

- **COMMITMENT AND ADVOCACY**

To maximise the Board's impact, we aim to expand their role beyond decision-making. We envision the Board as champions for social good, actively promoting initiatives that benefit the community, both within and outside the company. This could include involvement in events and conferences on social issues, alongside personal contributions to initiatives that align with the company's strategy.

- **SUSTAINABLE CHOICES**

Building a sustainable future requires collaboration. Therefore we are selecting our suppliers and collaborators with strong sustainability practices. To promote transparency and accountability, we are ensuring that our partners meet sustainability standards and hold relevant certifications. By doing so, we are taking a step towards a more environmentally responsible supply chain. With a long-term vision, we are building a sustainable ecosystem. Our supplier selection process prioritises ESG practices, and we aim to lead the industry towards a more sustainable future and encourage an industry-wide collaboration on these important issues.

Below is a list of some certifications in this area:

BCorp Certification , FSC Certification , Organic Certification , Fair Trade Certification , Leadership in Energy and Environmental and Design (LEED) Certification, ISO 9001 Certification, PEFC Certification, ISO 14001 Certification and EMAS Certification.

ESG STRATEGY 2024

PLANS FOR THE FUTURE

Not only are these initiatives about reducing our environmental impact, but they are also about building a more sustainable outlook for our planet and future generations. We believe that these initiatives are essential for the long-term success of businesses and for the well-being of our society. Together, we can make a difference.

• RESPONSIBLE PURCHASING

The selection of low-energy digital devices is a key part of our commitment to sustainability. We believe that this is an important step in reducing our environmental footprint:

1. *Low-Energy and Zero-Harmful-Emissions Printers:* all of our printers will be certified and guaranteed for low energy consumption and the absence of harmful emissions. This will contribute to reducing the environmental impact of our daily operations;
2. *Energy Star Certified Computers with Recycled Components:* We will only choose computers that are *Energy Star* certified, ensuring energy efficiency and emission reduction. In addition, most of the components of our computers will be made from recycled materials, promoting the circular economy while reducing environmental impact;
3. *All promotional accessories and corporate items* will be made using recycled and sustainable materials, thus contributing to reducing the use of natural resources and supporting eco-friendly production practices.

GOVERNANCE

• SURVEY DEVELOPMENT

To ensure transparency and accountability in our supply chain, we will develop questionnaires to assess supplier performance on ESG criteria. Additionally, we are going to invest in a training program to empower buyers and internal stakeholders to make responsible procurement decisions.

These initiatives ensure our suppliers align with our environmental, social, and governance standards, fostering a culture of sustainability throughout the supply chain.

CONCLUSION

The publication of our first Impact Report signifies the start of our dedicated pursuit towards integrating the principles of Corporate Social Responsibility (CSR) into the core of our organisation. Through this voluntary Impact Report, we demonstrate our commitment as a Benefit Corporation. We share the values and activities embedded in our 2023 strategies, setting a course for lasting impact in the years to come. Since our actions impact the environment and the local communities in which we operate, being recognised as a key player necessitates embracing sustainable development in our business decisions.

Acrisure Global's dynamic approach and international reach means our business practices have a significant impact. We recognise that a careless attitude is simply not an option. Having assessed our internal strengths, we will move beyond a self-referential approach.

Continuously monitoring ourselves and competitors allows us to adapt to market trends and modify our strategies to ensure long-term success. To continuously refine our self-assessment, we will annually update our methods, including the Materiality Analysis and B Impact Assessment, while incorporating new methodologies like GRI Standards.

Building on the past, we embrace change. Our ambitious goals require continuous improvement, and learning from our history propels our present and future actions.

The road ahead will not be without obstacles, but we have a clear vision of the ultimate goal. This cannot be met without the active participation of our management, employees, suppliers, and business partners. Fully embracing an inclusive culture that champions sustainable development is not just a single responsibility, it's a collaborative effort where, together, we can make a difference.
